CREATE A POSITIVE OUTLOOK.

Exterior windows for psychiatric facilities must guarantee safety and security for patients and staff. Their strength should be proven per rigorous ASTM testing. Equally important, they should foster serenity and contribute to an environment's healing properties. Hope's steel windows provide maximum safety and security with minimal framing. The result? More bountiful sunlight, wider views to nature, and an enduring elegance, providing true peace of mind.

PRISON WINDOWS SHOULD PROVIDE FREEDOM.

Freedom of design, function, and performance – precisely why more architects and engineers specify Hope's Correctional Window Systems for new and retrofit prison construction. With 28 distinct, tested, certified, and proven exterior security window systems, no manufacturer offers more options than Hope's. From maximum security cells to non-secure administrative areas, Hope's windows are also widely customizable and available in thermally enhanced configurations.

Operable Landmark175™ Series
solid steel window with
Thermal Evolution™ technology
U.S. Patent No. 8484902

Fixed Landmark175™ Series
solid steel window with
Thermal Evolution™ technology
Patent pending

Photo: IMG_LINK

BREAK WITH TRADITION. Traditionally, adding thermal breaks to solid steel windows meant dramatically weakening the steel materials that made them superior in the first place. Now, with Thermal Evolution™ technology, solid steel remains solid. And solid steel windows – fixed or operable – remain just as narrow and graceful as ever. Achieve an NFRC certified U-factor as low as 0.170 with enhanced condensation resistance. Ideal for new construction, retrofit, or historic preservation applications. Learn more today at www.hopeswindows.com/evolution

WINDOWS OF IMAGINATION. Every Hope's window and door is custom. Each handcrafted to your vision, and to the performance requirements of your project. Frame profile, glass to frame ratio, sightlines, shapes, curves, muntin profiles and placements, materials, and finishes – all you. Advanced thermally isolated framing and proven resistance to extreme conditions – all possible. Just imagine.

ART OF THE POSSIBLE. Hope's makes custom windows and doors. But not from wood, aluminum, fiberglass or vinyl. Instead, they're crafted from steel - solid, indestructible, precision hot-rolled steel. And it's this powerful distinction that makes all things possible. Narrowest framing. Maximum glass. Unlimited form and scale. Pure elegance, handcrafted to endure for generations.

TAKE A LONGER VIEW. Nothing lasts forever, but if ever there were a permanent window, Hope's is it. Custom crafted from the strongest and longest-lasting materials. Protected for generations with the most powerful coating system. Engineered with thermally-isolated framing for lifelong energy savings. This is why Hope's windows frequently replace other windows, but are rarely, if ever, replaced.
