HOPE'S WINDOWS THE WORLD'S FINEST HANDCRAFTED WINDOWS AND DOORS

Photograph by Patrick W. Price

Photograph by Marcus Gleysteen

Photograph by DMC, INC.

You've found a property with the most breathtaking view, your piece of paradise. You've created a vision that is your heart's desire, your dream home. Make sure you enjoy the full view.

Hope's Windows, Inc. provides extraordinary homes with the world's finest steel and bronze windows and doors—timeless in appearance and enduring for generations.

To say that Hope's is the source of the world's finest windows and doors is a bold statement! However Randy Manitta, President/CEO of the company, makes this claim with a depth of personal knowledge deriving from a 44-year tenure in the industry.

Hope's is the oldest and largest manufacturer of steel and bronze windows and doors in the United States. Designing and handcrafting solid steel and bronze windows and doors since 1912, the company continues to refine the art that makes their products the most sought-after, luxurious and longest lasting in the world.

Hope's solid steel and bronze windows and doors have a distinct appearance characterized by uniquely delicate frames and large areas of glass. This refined quality of elegance is impossible to achieve with other mediums. "Steel is one of the first raw materials used in the fabrication of windows, though it is often one of the least understood," contends Manitta.

Solid steel and bronze are stronger than any other window and door materials—strength that allows for substantially thinner frames, larger glass lites, and virtually unlimited scale and shape. This strength and design flexibility translates to more natural light and wider views.

Moreover, steel and bronze have a better natural insulating capability compared to other metals such as aluminum. This, together with modern advancements in glazing, results in exceptional thermal performance and condensation resistance.

SAIEH HALL FOR ECONOMICS

UNIVERSITY OF CHICAGO

HOPE'S SOLID STEEL WINDOWS HELP TRANSFORM HISTORIC BUILDING AT THE UNIVERSITY OF CHICAGO

Hope's custom, handcrafted hot-rolled solid steel windows were installed in an adaptive reuse project for the University of Chicago's new Saieh Hall for Economics in Chicago, IL.

Occupying a full city block, the first phase of this project transformed a seminary originally built in 1928 into a 100,000 sq. ft. building that preserves the beauty and grandeur of the historic structure while updating it with 21st century features and efficiencies.

The project involved the replacement of 307 windows. These included the installation of Hope's Jamestown175™ Series 45-minute fire rated fixed windows and swing doors; Jamestown175™ Series non-fire rated fixed windows and swing doors; and Landmark175™ Series side hung-in casement ventilators with custom 1¾" frame sightline to match existing windows.

“The Hope's windows improve building performance and maintain the historic character of the building,” says Katie Gerner, Associate, AIA, LEED AP of Ann Beha Architects in Boston, MA.

After a preservation assessment was completed, Gerner says “a window mock-up was performed during the design phase of the project to test different treatment options for aesthetics, performance, technical feasibility and cost.”

The strength of the steel window sections are ideal for projects requiring large glass lites while maintaining narrow sightlines.

Saieh Hall incorporates 77,000 sq. ft. of repurposed space and 23,000 sq. ft. of new construction. With a construction cost of \$54 million, Phase I of Saieh Hall has achieved LEED Gold.

HOPE'S®

(716) 665-5124

Hope's® Windows, Inc., based in Jamestown, NY, is the nation's leading and most experienced manufacturer of custom designed, solid hot-rolled steel and solid bronze window and door systems. Specializing in historic preservation, cultural, institutional, and commercial, applications, Hope's help architects achieve the most technically challenging design visions with unlimited shapes and sizes. Hope's advanced finishing system ensures that all Hope's steel windows and doors last longer than any other available, even under the most extreme environmental conditions.
