

# HOPE'S®

For more than a century, Hope's has handcrafted the world's finest steel and bronze windows and doors, and we continue to refine the art that makes them the strongest, most sought-after and longest lasting windows and doors available. Hope's exclusive hot-rolled steel and solid bronze frame profiles complement both contemporary architecture and traditional historic buildings while providing modern performance and efficiency – including advanced thermal, hurricane/impact, and fire-rated enhancements. Hope's custom windows and doors are built to last a lifetime and beyond – sustaining their beauty and performance for generations. [HopesWindows.com](https://www.hopeswindows.com)

# Hope's Introduces the Old World Suite™

Hope's is pleased to introduce our new fully developed, tested, and certified steel window and door product line — Old World Suite™.

The new product, with its incredibly thin arrow-shaped steel frame profiles, represents a return to old world style with the benefit of over 100 years of advancements in modern performance.

Old World Suite closely resembles the “three-point casement” product offered by Hope's in the early 1900s. The modern product line was developed in response to a need for historically accurate, high-performance replacement steel windows to replicate and preserve the visual features of historic buildings.

This suite of steel windows and doors is unique to the present-day market. It pays tribute to Hope's century-plus legacy as a custom steel fabricator and our prominent expertise in historic preservation.

Old World Suite's historically accurate profiles and sightlines are ideal restoration projects as well as new construction, and for both interior and exterior applications.

UNIVERSITY OF SOUTHERN CALIFORNIA SCHOOL OF CINEMATIC ARTS  
PRODUCTS SHOWN: Jamestown175™ Series steel windows and doors

ARCHITECT: Urban Design Group  
PHOTOGRAPHER: John Linden

JUNE 2022

# SCHOOL OF CINEMATIC ARTS

UNIVERSITY OF SOUTHERN CALIFORNIA

Hope's handcrafted steel windows and doors were installed in the School of Cinematic Arts – a four-acre complex of six buildings at the University of Southern California.

When acclaimed filmmaker George Lucas made his donation—the single largest gift in the university's history—he specifically requested the new campus for the School of Cinematic Arts reflect the historic Southern California Mission style prevalent in 1929, the year USC adopted film studies as part of its curriculum.

"The university is very pleased by the elegant look realized by the quality of Hope's steel windows and doors," says Carter Moore, an architect with Urban Design Group of Dallas, who worked on all three phases of the project and served as project manager for the final phase. Prior to each construction phase, the design team and contractor traveled to Hope's factories in Jamestown, NY to review how Hope's handcrafts its hot-rolled steel windows and doors.

"A high-profile project like this, which must satisfy some of the most creative minds in the world, received tremendous attention to detail. There's no doubt we will be using Hope's again in future projects."

— Carter Moore, Architect  
Urban Design Group

In addition to providing an elegant aesthetic, Moore says the durability of the Hope's products enabled the team to achieve another design objective: create buildings that would last for generations.

Hope's Jamestown175™ Series hot-rolled solid steel windows and doors were installed in all three phases. The project included about 200 arched and rectangular windows. Moore indicated that the design team was impressed with the structural strength the thin profiles can achieve.

The 200,000-square-foot space in the new complex offers courses in traditional film and television, but also animation, interactive, video games and other technologies. The buildings feature high-tech classrooms alongside Tuscany-inspired belvederes, interior courtyards, tile roofs and wrought iron gates.

## HOPE'S®

## 100+ YEARS STRONG IN WINDOW SECURITY, SAFETY, AND SUPERIOR PERFORMANCE

Meeting and exceeding both meticulous, independent testing and customer expectations begins with Hope's 100+ years of experience and expertise. Depend on Hope's for strong, durable, and rigorously tested steel security windows.

Hope's secure window systems are fully customizable for all safety, function, performance, and security requirements for correctional and behavioral health facilities.

- » Maximum security and non-secure options
- » Energy efficient and thermally enhanced
- » Superior strength and weather tightness
- » Integrated tool resistant steel
- » Full-depth welded corner construction
- » Low maintenance
- » Extremely long life cycle
- » Fixed, operable, and skylight configurations meet daylighting and ventilation needs
- » Steel, Stainless Steel, and hybrid Steel + Aluminum material options

### HOPE'S THIRD-PARTY CERTIFICATIONS
